## Organic Semiconductor Conference

29 September—1 October 2008, Frankfurt, Germany

The **Organic Semiconductor Conference (OSC)** is the premier international gathering for the discussion, demonstration and evaluation of organic semiconductor technologies and organic electronics. OSC-08 is the sixth conference in the series and takes place from 29 September-1 October 2008 in Frankfurt, Germany.

### Conference

Join over 500 engineers, researchers, product developers, managers, manufacturers, business leaders and investors to hear world-class speakers discuss the latest developments in the organic semiconductor and organic electronics industries. This year for the first time the conference will also be covering carbon nanotubes, graphenes and fullerenes.

### Exhibition

Running over two days, the Exhibition will showcase new technologies and products from leading-edge companies. Contact Anna.Volund@cintelliq.com for more information about exhibiting. (Don't delay: in 2007 the Exhibition sold out three months before the event and space is already selling fast for 2008.)

### Seminars

Seminars aimed at industry professionals, covering applications and processes, will be provided on the first day, together with seminars to help those new to the industry get up to speed.

### Location

The venue for OSC-08 is the Congress Centre at the Frankfurt Messe. This stunning and spacious venue will enable us to provide larger stands, as well as accommodating more exhibitors and more delegates in comfort. Frankfurt has excellent air, rail and road connections to Europe and the rest of the world.

### Sponsors

### OSC topics include:

|                 |                    |
|-----------------|--------------------|
| Transistors     | Memory             |
| Photovoltaic    | Backplanes         |
| Sensors         | Patterning         |
| Displays        | Substrates         |
| RFID            | Materials          |
| Smart packaging | Encapsulation      |
| Signage         | Deposition systems |
| Lighting        |                    |

### New topics for 2008:

carbon nanotubes  
graphenes  
fullerenes

### Confirmed speakers include

Acreo, Add-Vision, AIST, Aixtron, Bardsley Consulting, BASF, Cambrios, Cambridge Display Technology, cintelliq, DisplayBank, DuPont Research, DuPont Teijin Film, Evonik Degussa, Fluxim, Fraunhofer ISE, Fraunhofer IZM, FUJIFILM Dimatix, GIST, Holst Centre/TNO, IMEC, Imperial College London, ITRI, Kodak, Konarka, Liquavista, MicroEmissive Display, Merck, Mitsubishi Chemical, Nanoident, Nanomarkets, Nantero, Nokia, Novald, OLED-T, Olla Project, Plastic Logic, Polymer Vision, printed systems, RO Consulting, Siemens, Solarcoating Machinery, Solarmer Energy, Sumation, Thin Film Electronics, Thorn Lighting, UK Display and Lighting, Unidym, Universal Display Corp, University of Tokyo, Vitex Systems

## Call for papers

The peer-reviewed sessions at OSC-08 will run in parallel to the industry sessions on 30 September and 1 October. OSC-08 is now accepting papers for oral or poster presentation in the peer-reviewed sessions.

Papers are invited on subjects relating to organic semiconductor technologies including, but not restricted to, the areas listed overleaf. This year papers are also invited on the subject of carbon nanotubes, graphenes and fullerenes.

The deadline for the submission of a 300-word abstract and a 35-word summary is **Sunday 25 May 2008**. Abstracts and summaries should be sent to [jan.ruby@cintelliq.com](mailto:jan.ruby@cintelliq.com).

### Peer review committee

|                      |                          |
|----------------------|--------------------------|
| Ronald S Cok         | Eastman Kodak            |
| Craig Cruickshank    | cintelliq                |
| Dr Jiro Kasahara     | Sony Corporation         |
| Prof. Iain McCulloch | Imperial College, London |
| Dr Beat Ruhstaller   | University of Zurich     |
| Dr Takao Someya      | University of Tokyo      |

### Author timetable

| Date                        | Milestone   |
|-----------------------------|---|
| March 2008                  | Call for papers   |
| 25 May 2008                 | Deadline for submission of abstracts                          |
| May/June 2008               | Abstracts reviewed by committee                               |
| end June 2008               | Accepted authors notified                                     |
| 9 August 2008               | Deadline for submission of full                               |
| 30 September-1 October 2008 | Present paper in Session 4 or in poster session at conference |

### Author benefits

Authors of peer-reviewed papers accepted for oral or poster presentation are eligible for the academic delegate fee which must be received by 9 August 2008. This entitles them to attend *any* of the conference sessions as well as the exhibition and the networking events.

### More information

For more details please visit [www.osc-europe.com/papers.shtml](http://www.osc-europe.com/papers.shtml)

29 September—1 October 2008

### Organic Semiconductor Industry Awards

All papers accepted by the peer-review committee for presentation at OSC-08 will automatically be entered into the 'Best Peer Reviewed Paper' category of the **2008 Organic Semiconductor Industry Awards (OSIA)**. The winner will be announced at OSC-08. Nominations for the other OSIA categories will open in April.

### Registration

|                        |                 |
|------------------------|-----------------|
| Standard delegate rate | <b>€1095.00</b> |
| Academic delegate rate | <b>€550.00</b>  |
| Fee per seminar        | <b>€195.00</b>  |

### Exhibition

A full range of exhibition packages are available from a basic table-top space, to a mid-size booth, to large built exhibition stands. Prices start from **€1,800**.

### Delegate services

Benefits for delegates include:

- High quality presentations
- Conference proceedings available at the start of the conference
- Refreshments and full lunch provided on both conference days
- Drinks reception on evening of 30 September

### Your conference host

Industry experts **cintelliq** have been providing industry intelligence and technology consultancy to the organic semiconductor industry since 2002. **cintelliq** founded the first annual conference on organic semiconductors technologies in 2003. OSC-08 is the sixth conference in this series.
